# PwC's Supplier Relationship Management Solution

Delivering a single source of truth for suppliers and buyers

PwC's Supplier Relationship Management is a cloud-based integrated solution, *powered by* Salesforce, that facilitates collaboration and increases transparency and visibility between suppliers and buyers with intuitive, self-service capabilities for suppliers in a central location. Designed to deliver improved efficiency and built on the Lightning Bolt framework, this accelerator is mobile ready and features built-in Einstein Analytics throughout the tool.

Solution benefits

- Procurement engagement allows buyers and suppliers to perform end-to-end functions across procurement cycle
- Supplier can manage profiles, offerings, and purchase orders all while leveraging Chatter to communicate with an account team
- Buyers and suppliers can access the solution via any device without losing key capabilities or functionality
- Buyers and suppliers can manage 360 degree relationships with contextual analytics throughout the solution
